Learning objectives

The course that will be held in the SDI-dental clinic of the St. Francis Designated Referral hospital Ifakara (SFRH), as well as in the modern Tanzanian Training Centre for International Health, aims to teach young graduated dentists with limited clinical experience in basic oral surgery in managing clinical procedures like simple and complicated tooth extractions, abscess incisions, management of traumatic maxillofacial injuries and other surgical treatments.

The participants will have the opportunity to see behind the curtain of the daily routine in a tropical hospital guided by doctors of the St. Francis Referral hospital and get a picture of a typical African Country from a non tourist point of view.

The diversified program includes

City tour of Dar es Salaam and overview of dental practice in the largest town of Tanzania

- Transport to Ifakara by the Tanzanian-Sambian-Railways or Minibus
- Clinical and theoretical Course at the SFRH, Ifakara
- Prophylactic visits in schools of Ifakara
- Get a overview of the actual Malaria research of the Swiss tropical Institute
- Walking tour in the Udzungwa National Park to the Sanjee water falls
- Stay one night in the Mikumi National Park and see the unique wild life with game drives

Course fee

The total course fee is CHF 2'900 and must be paid in advance. This sum includes the registration fee (CHF 500) which is due at the moment of acceptance, the tuition fee and travel within Tanzania, as well as accommodation and full board during the time of the course.

As SDI is a non profit organisation, all of their experts as well as the instructors of the course are voluntary. The full course fee is invested locally and is part of the strategy to make the SDI-Clinic of Ifakara financially independent.

Participants

Due to the infrastructure, the course is limited to 8 participants. First come, first served.
